# Mazda MX-5 NC

Cruise Control buttons set – for track cars

installation example

functionality:

- Cruise Control

- EcuTek/RomDrop control

- dimmable buttons

- soldering required for install

installation requirement:

- cruise control harness with 4-pin brake switch (NC1 often dont have, offering retrofit sets)

- CC-supporting ECU (L831xx for NC1 1.8L <u>does NOT</u> support)

- connection near steering wheel (clock spring connector). Cable length 1m
